

LP-1020 Multi-Function Copier With Integrated Color Scanner*

*Requires Color Scanning Upgrade at an additional charge - only available on the LP-1020 model MF Copier

Actual scanning position of paper is image down. Photo is for illustrative purposes only.

Scan In And Send Changes Marked In Color

Does your business make occasional changes or markups that need to be communicated clearly? With the Teriostar LP-1020's integrated 600 dpi color scanner, redline markups (or any color) can be scanned and sent out using the same wide-format LED copier your business uses for printing. Scan to PDF, TIFF, BMP, PNG or JPEG. Includes full copier functionality just like the LP-1010, so copying, resizing, and archiving of any existing document is fast and easy.
